Education

Colorado State University

Fort Collins, CO

Bachelor of Science in Computer Science (General Concentration)

Aug. 2023 – May 2027

- Cumulative GPA: 3.5 — Fall 2025 Semester GPA: 4.0
- Honors: Dean's List (Fall 2025), Dean's List (Spring 2026)

Relevant Coursework

- | | | | |
|------------------------|-----------------------|--------------------|-----------------------|
| • Software Development | • Data Structures | • Linear Algebra | • Applied Statistics |
| • Software Engineering | • Computer Systems | • C++ Fundamentals | • Ethical Computing |
| • Operating Systems | • Discrete Structures | • Web Design & Dev | • Python Fundamentals |

Projects

KanaCard: Japanese Learning App | *Swift, SwiftUI, SwiftData, Xcode*

2025 – 2026

- Designed and built entirely by hand (no AI-generated code) as a deep dive into SwiftUI: a 200+ character Hiragana/Katakana flashcard system with filtering across script type and four kana variants (seion, dakuon, handakuon, yōon) using MVVM and the `@Observable` state pattern.
- Implemented a from-scratch SM-2 spaced-repetition algorithm with SwiftData persistence, tracking per-card ease factor, interval, and due date to schedule an adaptive daily review queue.
- Built a Swift Charts progress dashboard with mastery breakdowns and a rating-history pie chart, alongside custom 3D card-flip and drag-gesture animations, haptic feedback, and six selectable color themes.

Real-Time Environmental Monitor | *macOS, SwiftUI, Firebase, Swift Charts*

Spring 2026

- Architected the native macOS client for a CS 370 team project, owning the Firebase integration, data model, and overall app structure for live UV sensor data collected by a Raspberry Pi.
- Established a Firebase Realtime Database pipeline between the hardware team's Python services and the Swift client.

Independent App Store Portfolio | *Swift, SwiftUI, App Store Connect, StoreKit*

2022 – Present

- Shipped six apps to the App Store as a self-taught developer including games, education, and productivity tools spanning iOS, iPadOS, macOS, watchOS, and visionOS.
- Own the full release pipeline: code signing, provisioning profiles, App Store Review, TestFlight beta distribution, StoreKit in-app purchases, and AdMob integration. AI coding tools accelerate implementation; architecture, testing, and every release decision are mine.
- Monitor crash reports and user reviews after every launch, shipping stability and feature updates across multiple release cycles.

Technical Skills

Languages: Swift, Python, Java, C++, C, HTML/CSS

Developer Tools: Xcode, Git/GitHub, Firebase, App Store Connect, TestFlight, AdMob, VS Code, Raspberry Pi

Apple Frameworks: SwiftUI, SwiftData, Swift Concurrency, Swift Charts, UIKit, StoreKit

Experience

Husmann

Aug. 2022 – Jun. 2023

Junior Service Technician

Denver, CO

- Performed maintenance and technical troubleshooting for commercial refrigeration systems.
- Developed mechanical aptitude and analytical skills while assisting senior technicians in the field.
