Education

Colorado State University

Fort Collins, CO

Bachelor of Science in Computer Science (General Concentration)

Aug. 2023 – May 2027

- Cumulative GPA: 3.5 — Fall 2025 Semester GPA: 4.0
- Honors: Dean's List (Fall 2025), Dean's List (Spring 2026)

Relevant Coursework

- | | | | |
|------------------------|-----------------------|--------------------|-----------------------|
| • Software Development | • Data Structures | • Linear Algebra | • Applied Statistics |
| • Software Engineering | • Computer Systems | • C++ Fundamentals | • Ethical Computing |
| • Operating Systems | • Discrete Structures | • Web Design & Dev | • Python Fundamentals |

Projects

KanaCard: Japanese Learning App | *Swift, SwiftUI, SwiftData, Xcode*

2025 – 2026

- Built solo, without AI assistance, as a benchmark of personal SwiftUI proficiency; architected a 200+ character Hiragana/Katakana flashcard deck with filtering across script type and four kana variants (seion, dakuon, handakuon, yōon) using MVVM and the `@Observable` state pattern.
- Implemented a from-scratch SM-2 spaced-repetition algorithm with SwiftData persistence, tracking per-card ease factor, interval, and due date to schedule an adaptive daily review queue.
- Built a Swift Charts progress dashboard with mastery breakdowns and a rating-history pie chart, alongside custom 3D card-flip and drag-gesture animations, haptic feedback, and six selectable color themes.

Real-Time Environmental Monitor | *macOS, SwiftUI, Firebase, Swift Charts*

2026

- Architected the native macOS client for a CS 370 team project, owning the Firebase integration, data model, and overall app structure for live UV sensor data collected by a Raspberry Pi.
- Established a Firebase Realtime Database pipeline between the hardware team's Python services and the Swift client.

iOS App Shipping Experience | *App Store Connect, AdMob, StoreKit*

2022 – 2025

- Shipped multiple applications to the iOS App Store as a self-taught developer learning through AI-assisted code generation, focusing hands-on effort on the end-to-end shipping pipeline rather than primary code authorship.
- Configured and navigated the full Apple Developer program: code signing, provisioning profiles, App Store Review, TestFlight, AdMob ad integration, and StoreKit in-app purchase setup.
- Responded to real user crash reports and feedback across multiple releases to improve stability.

Technical Skills

Languages: Swift, Python, Java, C++ (coursework-level); C (learning in OS coursework); HTML/CSS

Developer Tools: Xcode, VS Code, Git/GitHub, Firebase, App Store Connect, AdMob, Raspberry Pi

Apple Frameworks: SwiftUI, Swift Concurrency, Swift Charts, UIKit (exposure), StoreKit (configuration)

Experience

Montrose Regional Airport (MTJ)

Jan. 2025 – Feb. 2025

Ramp Agent

Montrose, CO

- Managed time-critical ground operations and logistics for commercial aircraft arrivals and departures.
- Coordinated with team members in high-pressure environments to ensure safety protocols and efficiency.

Husmann

Aug. 2022 – Jun. 2023

Junior Service Technician

Denver, CO

- Performed maintenance and technical troubleshooting for commercial refrigeration systems.
- Developed mechanical aptitude and analytical skills while assisting senior technicians in the field.
